

Dear FDA,

I am writing to express my concern over the FDA's regulation of engineered (GE) food, to ask that the agency's current policies be changed, and to support all the points in docket # 00P-1211/CPI, specifically:

- All GE foods should be labeled so I am informed and have a choice.
- GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing.
- There should be a moratorium on GE foods and crops until long term studies show they are safe for human health and the environment.

Little Marais, MN 55614**

Additional Personal Comments:

There have been too many recalls already on foods mass produced for the public - supposedly w/ un-GE grains.

only to be told later that they were genetically altered.

Very serious for allergies.
